Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 39, 41-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenney et al. (US Pat. 5,725,928).

Kenney et al. teaches the basic claimed process of making a touch fastener, comprising: forming a composite polymeric sheet of at least two different materials having a boundary therebetween and fastener element stems with engageable heads extending from at least one surface (Figs. 7-10); wherein one of the polymeric materials is a foam material (3:25-40); and wherein a plurality side-by-side layers/lanes (ie. at least two) are formed by bonding/laminating or coextrusion (3:25-40).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1732

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 44-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenney et al. (US Pat. 5,725,928).

Kenney et al. teaches the basic claimed process as set forth above. Kenney et al. does not teach a thermosetting foam. However, Official Notice is given that thermosetting foams, such as elastomeric polyisocyanurates and polyurethanes, expanded by chemical blowing agents or gas, are well known in the molding/laminate art. At the time of invention a person of ordinary skill in the art would have found it obvious to have used such foaming means as commonly practiced in the art, in the process of Kenney et al., and would have been motivated to do so provide a compatible and flexible backing for use in an automobile seat.

Art Unit: 1732

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
See attached PTO-892.
